Check Coolant Level and Top (up if required)	● ● ●
Check and Advise on Antifreeze Strength	● ● ●
Check Radiator and Coolant Hoses Condition, and Check for Leaks including Header Tank	● ● ●
Check Radiator Cap	● ● ●
Check Auxiliary Drive Belt Tension (excluding Timing Belt)	● ● ●
Change Spark Plugs (dependent on mileage)	● ● ●
Check Cooling Fan Function	● ● ●
Check HT Leads and Components (if applicable)	● ● ●
Check Effectiveness of Starter Motor	● ● ●

Check Fuel Cap		
Check Fuel System and Tank Straps (if visible)		
Check Timing Belt Interval and Advise		

Brakes

Check Brake Servo Operation		
Remove Road Wheels		
Check Brake Fluid Boiling Point Report if Low		
Top up Brake Fluid (if required)		

	Offside			Nearside		
Check Brake Pads or Shoes for Wear	Front	mm		Front	mm	
	Rear	mm		Rear	mm	
Check Brake Discs for Wear	Front	mm		Front	mm	
	Rear	mm		Rear	mm	

Check Brake Pipes and Brake Hoses		
Check Operation of Handbrake and Linkages and Travel		
Check Brake Calliper s and Slides		
Check Brake Cylinders for Wear and Leakage & Damage		

We recommend that brake pads are changed when at 3mm or below. With brake discs, please refer to your manufacturer specifications or discuss with out technician.

Wheels and Tyres

	Offside			Nearside		
Check Tyre Condition	Front	mm		Front	mm	
	Rear	mm		Rear	mm	
				Spare	mm	
Check and Adjust Tyre Pressures						
Check Tyre Tread Depths						
Check Road Wheels Tyre are Same Size per Axle						

The legal limit for car tyre tread depth is 1.6mm (across 75% of the tyre) However the deeper the tread the more grip you have. We recommend that you replace your tyres when the tread is less than 3mm as the performance of the tyre will begin to reduce significantly.

Steering and Suspension

Check Condition of Road Springs		
Check Power Steering Fluid Top up (if Required)		
Check Steering and Suspension Components for Wear and Excessive Corrosion		
Check Steering Rack Gaiter Condition		
Check Shock Absorber Condition & Mountings
